HT-DS100

Super Slim Home Theater System

VIDEO

Progressive Scan Video allows superior non-interlaced images to be sent to the latest digital television receivers. The smooth, progressive scan image eliminates even the slightest hint of blur or distortion, bringing new realism to DVD movies or DVD video selections.

3:2 Pulldown Technology – The new 3:2 pulldown system further improves progressive scan images by instantly displaying content originally shot at the 24 frame per second film standard in their original form. The result is DVD movie images that are incredibly smooth and natural.

Flexibility of Format Playback: DVD, CD- MP3, WMA, JPEG CD-R/RW Viewer.

AUDIO

Surround Sound – Dolby® Digital, Dolby® Pro Logic® II, Digital Theater System, MPEG II, MP3 – Dolby® Pro Logic® II converts 2 channel surround sound into more realistic 5.1 channel surround sound – even for external sources like your VCR.

24 Bit D/A processing ensure absolute accuracy with every disc, especially the recent releases recorded in the ultra high fidelity 24 Bit/96 kHz format.

Headphone Output and Audio Level Control

CONVENIENCE

Compact Design fits in stylishly, without imposing on your living space.

Advanced Comprehensive Remote Control one remote control for all your entertainment needs.

Ease and Flexibility: The progressive components output also prepares you for the future with progressive video output for digital displays like high-definition TVs (HDTVs) with video component inputs.
